

It's shocking that there will be no opportunity for the public to comment on the Media Ownership Program that will be voted on June 2nd.

The airways are public, owned by the people, not by the government. Nor should they be owned by corporations, yet:

General Electric owns NBC  
Disney owns ABC  
Viacom owns CBS  
Time Warner owns CNN

When this is the case, I don't think it is possible for the major networks to address economic issues of concern to the majority of Americans - issues such as the growing economic inequality and insecurity in the United States.

We have to rely on the FCC to support the common good...please do so on the behalf of ALL of us.
